

Products for the fu

For consumers in wheelchairs, the dream o

Mobility Works (see ad on page 49)) will be the exclusive US distributor and manufacturer for the Martin Conquest wheelchair accessible motorcycle.

Bill Koeblitz, one of the founders of Mobility Works, stated, “We are honored to be chosen to introduce the first production wheelchair accessible motorcycle to our physically challenged community here in the United States.”

According to Mark Allen Roberts, who will head up Mobility Conquest, “We look forward to helping physically challenged members of our community reconnect with their passion for riding motorcycles.

The few motorcycles that were produced were custom affairs, available only to those with sufficient funding to have

such a vehicle commissioned.

Mobility Conquest offers access to some of the most powerful, high-performance road machines anywhere, designed by and for consumers in wheelchairs.

The heart of the vehicle is the front end and engine of a BMW R 1170. At a glance, the bike offers a 0-60 speed of just 7.6 seconds (with wheelchair adaptation), 15-second quarter mile time and a top speed of 105 mph.

Drivers will board the bike via a remote controlled rising and lowering ramp at the rear. The chassis provides tremendous stability, as well (transforming the bike into a trike). The Conquest also features six forward gears, full reverse and an electronic parking brake.

fun of it

of riding a motorcycle no longer a fantasy.

Safety features for drivers include a wheelchair locking system, which features a push button release, as well as hydraulic front and rear racing disc brakes, operated from a single lever. The clutch is thumb-controlled, thanks to a 2-button Klicktronic system for semi-automatic operation.

The Martin Conquest is also in compliance with all US Federal laws and guidelines for handicap accessible vehicles.

Mobility Conquest President, Mark Roberts, 602-206-6918.

Going fishing

Turboset allows disabled people to enjoy fishing. The Turboset Power Booster offers enormous leverage and control for people with reduced arm and hand strength or lack of stability while sitting or standing.

Even though the Turboset Power Booster seems simple, it opens up a whole new world of opportunity to those whose physical lives are far from easy.

America's Fishing Device Inc. has been working closely with national, state and local organizations, bringing the Turbosets to fishing camps and events for people to enjoy.

Navigating the mall

For many mall shoppers, finding the store from a directory kiosk can be impossible.

FastMall™ – an interactive iPhone application – helps avoid frustration.

FastMall™ – an interactive iPhone application – helps you easily navigate malls and major shopping destinations by-turn guidance. much like Google maps. The FastMall works indoors and allows users to customize by-turn directions to include the fastest route to a destination, or a route using only escalators or only elevators. ideal for parents with strollers and individuals with limited mobility. Need a restroom? Simply tap the toilet icon or shake your iPhone and FastMall shows you the nearest restroom to your location. When it's time to grab a snack, tap the

button and FastMall displays all the dining options available.

Smooth ride

The BOUNDER Plus H-Frame power wheelchair, manufactured by 21st Century SCIENTIFIC Inc., offers the best in off-road performance. The special 14" x 5.40" low pressure pneumatic tires makes going over rough terrain no longer bumpy and jarring. The knobby tire design provides excellent traction when traversing loose terrain, mud or snow. The Super Torque 4 medium speed motors have all the

torque needed to climb steep hills. A sliding battery box provides extended range (up to 40 miles per charge) and easy battery maintenance. A smart electric brake release switch offers easy pushing of the chair by an attendant.

Options include power seat elevator with 13" of elevation, power standing, power recline, power tilt, and dual independent power elevating leg rests.. A power front load system is available for those who require assistance transferring. All power seating systems can be controlled through-the-joystick as an available option. www.wheelchairs.com.
